### ELECTROCUBE OFFERS ALUMINUM AND COPPER FOIL TRANSFORMERS

MONROVIA, Calif...**Electrocube, Inc.**, a leading manufacturer of precision capacitors and other passive components, is offering aluminum and copper foil transformers.

As a result of a company-funded development and testing program, **Electrocube** introduced this unique construction technology, providing practical and economical foil-wound transformers in the 25 VA to 50 KVA power range.

For over thirty-five years, these foil transformers have been used in commercial and military applications exhibiting exceptional reliability and efficiency. The use of aluminum or copper foils result in a transformer with many advantages over conventional wire-wound versions:

- Exceptional reliability
- Reduced size and weight
- Higher ambient temperature operating capability
- Improved electrical efficiency
- Increased electrical stress resistance
- Better overall regulation

For additional information on **Electrocube** and their aluminum and copper foil transformers, please visit their website at [www.electrocube.com](http://www.electrocube.com) or contact: Ms. Gloria Snyder, National Sales Manager, **Electrocube, Inc.**, 1307 S. Myrtle Ave., Monrovia, California 91016, TEL: (800) 515-1112; FAX: (626) 357-8099; e-mail: [gloriasnyder@electrocube.com](mailto:gloriasnyder@electrocube.com).
